

Advisory 17-02 Change in Epinephrine Labeling

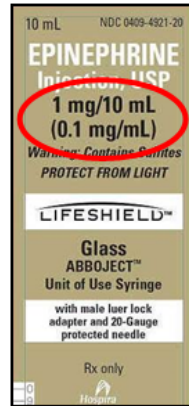

To: All Providers and Agencies

From: Jeremy T. Cushman, MD, MS, EMT-P *J. Cushman*
Regional Medical Director

Date: April 6, 2017

Recent changes by the United States Pharmacopeial Convention have changed the way epinephrine will be labeled. The ratio expressions (1:1,000 and 1:10,000) will no longer appear on packaging, syringes and individual ampules/vials. Instead, only the (mg/ml) strength of the epinephrine will appear. Please inform all of your Paramedic providers immediately and post the attached poster conspicuously at your agency.

NEW LABELING

Prefilled Syringe Packaging

Prefilled Syringe Label

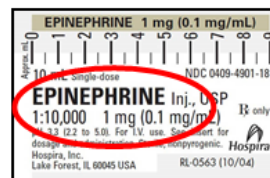

Epinephrine Ampules

OLD LABELING

Prefilled Syringe Packaging

Prefilled Syringe Label

Epinephrine Ampules

NEW DRUG LABELING

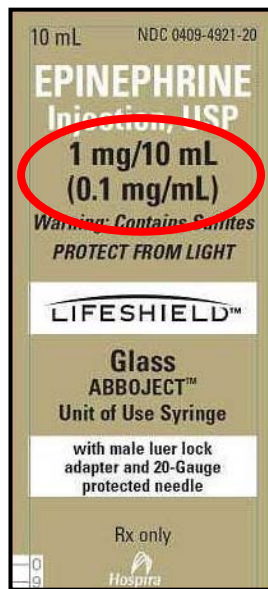

EPINEPHRINE

ATTENTION ALL EMS PROVIDERS:

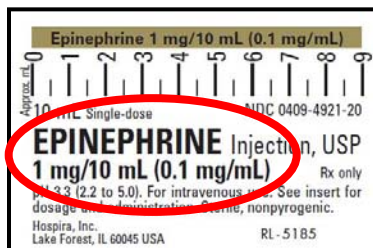

Recent changes by the United States Pharmacopeial Convention have changed the way epinephrine will be labeled. The ratio expressions (1:1,000 and 1:10,000) will no longer appear on packaging, syringes and individual ampules/vials. Instead, only the (mg/ml) strength of the epinephrine will appear.

The below images represent the changes from one particular manufacturer, but this change will affect ALL manufactures of epinephrine in the days to come. Please be attentive to the changes in your practice moving forward.
