Re: Advisory 10-04 Controlled Substance Requirement for ALS Agencies

At their April 20, 2009 meeting, the REMAC identified that in order to meet the standard of care defined in regional protocols, effective April 30, 2010 agencies must carry controlled substances in order to be recognized as an ALS agency in the Monroe-Livingston Region. This serves as a final reminder to agencies that failure to do so will revert the agency to the intermediate life support level of care effective May 1, 2010.

With any questions or assistance in meeting this requirement, please do not hesitate to contact the Regional program Agency.
